

PetroChem Holds Open House for Technical Presentations

Bob Burns, President, greets guests.

Computerized Radiography was demonstrated after a discussion on the advantages of CR versus standard radiography and an update on the codes.

Richard Cook, VP of Technical Services, presented "Long-Range Guided Wave Ultrasonics: Applications and Limitations." PetroChem built a test loop in the Houston facility which was used to demonstrate the tool and how it can be used to inspect unpiggable pipe in inaccessible areas.

And, of course, what is an open house without a barbecue lunch?
